

**Amendments to the Claims**

This listing of claims, if entered, will replace all prior versions and listings of claims in the above-identified application.

**Listing of Claims**

1. (Original) A method in a computing system for managing a service request, the method comprising:  
extracting service request information in a first form that is associated with a first source computerized service request management system;  
converting the service request information in the first form into service request information that is in a second intermediate form;  
converting the service request information in the second intermediate form into service request information in a target form that corresponds to a target computerized service request management system.
2. (Original) The method of claim 1, further comprising:  
using the service request information in the target form to perform at least one computer-implemented act from a set of computer-implemented acts comprising:  
creating a new service request record in the target computerized service request management system; and  
updating an existing service request record in the target computerized service request management system.
3. (Original) The method of claim 1, further comprising:  
extracting service request information in a third form that is associated with a second source computerized service request management system that is distinct from the first source computerized service request management system;  
converting the service request information in the third form into service request information that is in the second intermediate form;  
converting the service request information in the second intermediate form into service request information in the target form; and

using the service request information in the target form to perform at least one computer-implemented act from a set of computer-implemented acts comprising:  
creating a new service request record in the target computerized service request management system; and updating an existing service request record in the target computerized service request management system.

4. (Original) The method of claim 1, wherein the second intermediate form includes a list of service request element with a hierarchy of data components.

5. (Original) The method of claim 4, wherein the hierarchy of data components includes a plurality of service request components, wherein each of the plurality of service request components includes one or more of:

- a service request common ID component;
- a service request base data component;
- a related parent area component;
- a related root area component;
- a related contract component;
- a list of related contacts component;
- a list of related account component;
- a list of related owner component;
- a status data component;
- a related product component for defining internal and external products;
- a related installed product component for defining customer assets;
- a related business unit component; a list of related activity component; and
- a service request custom data component.

6. (Original) The method of claim 5, wherein the service request base data component includes one or more of:

- an abstract component for summarizing the service request;
- a channel source code component;
- a closed date component for defining when the service request is closed;
- a commit time component;
- a description component;

a service request number component; and  
a reported date component.

7. (Original) The method of claim 5, wherein the related parent area component includes a parent area component, wherein the parent area component includes one or more of:

a functional area common ID component;  
a base data component that can include a functional area name component;  
a list of related sub-areas component that can include any number of related sub-area components; and  
a functional area custom data component.

8. (Original) The method of claim 5, wherein the related root area component includes a common ID for functional area.

9. (Original) The method of claim 5, wherein the related contract component includes one or more of:

a contract common ID component;  
a contract base data component, wherein contract base data component includes one or more of:  
a related contract description component;  
an effective-to date component;  
a type code component;  
a contract number component;  
an effective-from date component;  
a response code component;  
a response time component; and  
a related contract custom data component.

10. (Original) The method of claim 5, wherein the list of related contact component includes a plurality of related contact components, wherein each of the plurality of related contact components includes one or more of:

- a common ID for a party component;
- a communication data for a party component;
- a data cleansing data component;
- a list of address of a party component;
- a list of relationships that a party can have with other entities component;
- a list of alternate ID component;
- a list of license data component;
- a custom party data component;
- a person base data component;
- a privacy data component; and
- a related contact custom data component.

11. (Original) The method of claim 5, wherein the list of related account component includes a plurality of related account components, wherein each of the plurality of related account components includes one or more of:

- a common ID for a party component;
- a communication data for a party component;
- a data cleansing data component;
- a list of address of a party component;
- a list of relationships that a party can have with other entities component;
- a list of alternate ID component;
- a list of license data component;
- a custom party data component;
- a party base data component; and
- a related contact custom data component.

12. (Original) The method of claim 5, wherein the list of related owner component includes a plurality of related owner components, wherein each of the plurality of related owner components includes one or more of:

- a common ID for a party component;
- a communication data for a party component;
- a data cleansing data component;
- a list of address of a party component;
- a list of relationships that a party can have with other entities component;
- a list of alternate ID component;
- a list of license data component;
- a custom party data component;
- a person base data component;
- a privacy data component; and
- a related contact custom data component.

13. (Original) The method of claim 5, wherein the status data component includes one or more of:

- a priority code component;
- a severity code component;
- a status code component; and
- a sub-status code component.

14. (Original) The method of claim 5, wherein the related product component includes one or more of:

- a product ID component;
- a product base data component;
- a product sales data component;
- a configuration data component;
- a related product line component;
- a list of price type component;
- a list of related inventory location component;
- a list of related product component;

a list of related business unit component; and  
a product custom data component.

15. (Original) The method of claim 5, wherein the related installed product component includes one or more of:

- a common ID of an installed product component;
- an installed product base data component;
- a related parent installed product component;
- a pricing data component;
- a related product component a list of related party component;
- a list of related order component;
- a related inventory location component;
- a related business unit component;
- a list of attribute component;
- a custom data component; and
- a list of related installed product component, wherein
  - the list of related installed product component includes one or more of:
    - an external product ID component;
    - an external product base data component;
    - an external product sales data component;
    - an external product configuration data component;
    - an external product related product line component;
    - an external product list of price type component;
    - an external product list of related inventory location component;
    - an external product list of related product component;
    - an external product list of related business unit component; and
    - an external product custom data component.

16. (Original) The method of claim 5, wherein the related business unit component includes a related business unit common ID.

17. (Original) The method of claim 5, wherein the list of related activity component includes a plurality of related activity components, wherein each of the plurality of related activity components includes one or more of:

- an access code component;
- a comment on action taken component;
- a duration component;
- an end date component;
- an activity number component;
- a reason code component;
- a start date component;
- a task description of action taken component;
- a type code component; and
- a related owner component.

18. (Original) A computer-readable medium carrying one or more sequences of instructions for managing a service request, wherein execution of the one or more sequences of instructions by one or more processors causes the one or more processors to perform:

- extracting service request information in a first form that is associated with a first source computerized service request management system;
- converting the service request information in the first form into service request information that is in a second intermediate form;
- converting the service request information in the second intermediate form into service request information in a target form that corresponds to a target computerized service request management system.

19. (Original) The computer-readable medium of claim 18, further comprising:  
using the service request information in the target form to perform at least one computer-implemented act from a set of computer-implemented acts comprising:  
creating a new service request record in the target computerized service request management system; and updating an existing service request record in the target computerized service request management system.

20. (Currently Amended) A ~~data structure for managing a service request system,~~  
comprising:

a processor;

an interconnect coupled to the processor; and

a computer-readable storage medium coupled to the processor via the

interconnect, the computer-readable storage medium comprises ~~the~~ a  
data structure comprising a list of service request element with a hierarchy  
of data components.

21. (Original) The data structure of claim 20, wherein the hierarchy of data components  
includes a plurality of service request components, wherein each of the plurality of service  
request components includes one or more of:

a service request common ID component; a service request base data component;

a related parent area component;

a related root area component; a related contract component;

a list of related contacts component;

a list of related account component;

a list of related owner component;

a status data component;

a related product component for defining internal and external products;

a related installed product component for defining customer assets;

a related business unit component;

a list of related activity component; and

a service request custom data component.

22. (Original) The data structure of claim 21, wherein the service request base data component includes one or more of:
- a abstract component for summarizing the service request;
  - a channel source code component;
  - a closed date component for defining when the service request is closed;
  - a commit time component;
  - a description component;
  - a service request number component; and
  - a reported date component.
23. (Original) The data structure of claim 21, wherein the related parent area component includes a parent area component, wherein the parent area component includes one or more of:
- a functional area common ID component;
  - a base data component that can include a functional area name component;
  - a list of related sub-areas component that can include any number of related sub-area components; and
  - a functional area custom data component.
24. (Original) The data structure of claim 21, wherein the related root area component includes a common ID for functional area.
25. (Original) The data structure of claim 21, wherein the related contract component includes one or more of:
- a contract common ID component;
  - a contract base data component, wherein contract base data component includes one or more of:
    - a related contract description component;
    - an effective-to date component;
    - a type code component;
    - a contract number component;
    - an effective-from date component;
    - a response code component;

a response time component; and  
a related contract custom data component.

26. (Original) The data structure of claim 21, wherein the list of related contact component includes a plurality of related contact components, wherein each of the plurality of related contact components includes one or more of:

a common ID for a party component;  
a communication data for a party component;  
a data cleansing data component;  
a list of address of a party component;  
a list of relationships that a party can have with other entities component;  
a list of alternate ID component;  
a list of license data component;  
a custom party data component;  
a person base data component;  
a privacy data component; and  
a related contact custom data component.

27. (Original) The data structure of claim 21, wherein the list of related account component includes a plurality of related account components, wherein each of the plurality of related account components includes one or more of:

a common ID for a party component;  
a communication data for a party component;  
a data cleansing data component;  
a list of address of a party component;  
a list of relationships that a party can have with other entities component;  
a list of alternate ID component;  
a list of license data component;  
a custom party data component;  
a party base data component; and  
a related contact custom data component.

28. (Original) The data structure of claim 21, wherein the list of related owner component includes a plurality of related owner components, wherein each of the plurality of related owner components includes one or more of:

- a common ID for a party component;
- a communication data for a party component;
- a data cleansing data component;
- a list of address of a party component;
- a list of relationships that a party can have with other entities component;
- a list of alternate ID component;
- a list of license data component;
- a custom party data component;
- a person base data component;
- a privacy data component; and
- a related contact custom data component.

29. (Original) The data structure of claim 21, wherein the status data component includes one or more of:

- a priority code component;
- a severity code component;
- a status code component; and
- a sub-status code component.

30. (Original) The data structure of claim 21, wherein the related product component includes one or more of:

- a product ID component;
- a product base data component;
- a product sales data component;
- a configuration data component;
- a related product line component;
- a list of price type component;
- a list of related inventory location component;
- a list of related product component;
- a list of related business unit component; and
- a product custom data component.

31. (Original) The data structure of claim 21, wherein the related installed product component includes one or more of:

- a common ID of an installed product component;
- an installed product base data component;
- a related parent installed product component; a pricing data component; a related product component a list of related party component; a list of related order component; a related inventory location component; a related business unit component; a list of attribute component; a custom data component; and a list of related installed product component, wherein the list of related installed product component includes one or more of:
  - an external product ID component; an external product base data component; an external product sales data component; an external product configuration data component; an external product related product line component; an external product list of price type component; an external product list of related inventory location component; an external product list of related product component; an external product list of related business unit component; and an external product custom data component.

32. (Original) The data structure of claim 21, wherein the related business unit component includes a related business unit common ID.

33. (Original) The data structure of claim 21, wherein the list of related activity component includes a plurality of related activity components, wherein each of the plurality of related activity components includes one or more of:

- an access code component;
- a comment on action taken component;
- a duration component;
- an end date component;
- an activity number component;
- a reason code component;
- a start date component;
- a task description of action taken component;
- a type code component; and
- a related owner component.
